DINDI SAI CHARAN

Cloud & DevOps Engineer | Computer Science Graduate (B.Tech, 2026)

Visakhapatnam, India | +91 9618619374 | sc31072004@gmail.com

linkedin.com/in/dindi-sai-charan | github.com/SaicharanDindi

PROFESSIONAL SUMMARY

Computer Science graduate (B.Tech, 2026) targeting Cloud Engineer and DevOps roles, with hands-on exposure to AWS, Microsoft Azure and Google Cloud Platform, containerisation with Docker, Kubernetes and Terraform, and Linux with shell scripting. Experienced in building and deploying full-stack applications using Python, Flask, Node.js and React, version control with Git and GitHub, and Agile teamwork across two internships. Holds a cloud certification and co-authored a research paper on Explainable AI. Seeking an entry-level role to help build reliable, automated and scalable cloud infrastructure.

TECHNICAL SKILLS

Cloud Platforms: AWS, Microsoft Azure, Google Cloud Platform (GCP)

Containers & Infrastructure as Code: Docker, Kubernetes, Terraform

Operating Systems & Scripting: Linux, Shell Scripting, Python

Version Control & Methodology: Git, GitHub, Agile

Backend & APIs: Python, Flask, Node.js, Express.js, RESTful APIs

Databases: MySQL, MongoDB

Frontend: JavaScript, React.js, HTML5, CSS3

PROJECTS

Real-Time Number Plate Detection System *Python, OpenCV, YOLO, Linux*

- Built an automated system that detects vehicle number plates from live video streams with real-time frame processing.
- Applied computer vision techniques and evaluated detection accuracy using validation metrics; developed and run in a Linux environment.

Disease Prediction System *Flask, React, Machine Learning*

- Developed a full-stack web application where users enter symptoms and receive predicted conditions.
- Implemented machine learning classification models and exposed them through Flask REST APIs consumed by a React front end.
- Performed data preprocessing and feature handling using Pandas and Scikit-learn.

EXPERIENCE

Student Developer | Next Chapter Skill (Remote) *May 2024 – Jul 2024*

- Developed and tested full-stack healthcare web applications using React and Flask REST APIs within an Agile team.
- Integrated machine learning models into application workflows and validated outputs through systematic testing.
- Debugged and refined features iteratively to improve reliability and performance, delivering on schedule.

Web Development Intern | InternPe (Remote) *May 2023 – Jun 2023*

- Built responsive web pages using HTML, CSS and JavaScript across screen sizes.
- Debugged and optimised application code to improve performance and usability, following software development best practices.

EDUCATION

B.Tech in Computer Science Engineering | GITAM University, Visakhapatnam *2022 – 2026*

Intermediate (MPC) | Sri Chaitanya Junior College, Visakhapatnam *2020 – 2022*

CERTIFICATIONS & RESEARCH

- Cloud Certification: [Add exact certification name – issuing body, year]
- Full Stack AIML Certification; Web Development Certification
- Co-authored research paper: Explainable AI in Object Detection (XAI, Deep Learning)
